

March 16, 2020

Dear Students,

As we all know, our current situation has been affected by COVID-19. While your education is our mission, everyone's health and well being is fundamental.

Classes are suspended starting at 500pm today, March 16 until Friday, March 20, 2020.

Effective Saturday, March 21, 2020, Altamont Healthcare will suspend in person or classroom instructions and will conduct instructions online. It is expected that regular classroom instructions will resume on Monday, April 20 at the latest.

Students will continue to advance with their studies and are expected to finish as scheduled. Please be assured that Altamont Healthcare is doing its best for your continued learning experience.

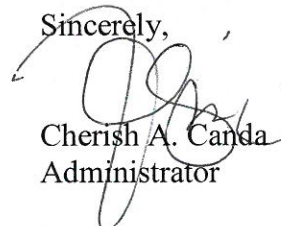

This decision has been reached based on current published guidance by health authorities and actions taken by similar educational institutions. We are not aware of anyone confirmed with COVID-19 in our school, but we do our part to limit the impact and mitigate the damage that this has caused.

Instructors will deliver lectures only, with laboratory time to be conducted when regular classes resume or when instructor deems it necessary to designate lab days prior to resumption of regular classes.

Your instructors and Altamont Healthcare staff will be available to provide support to your educational needs. Further instructions will be given in the next few days. If you have any issues with online access, please notify our staff for assistance.

During this challenging time, be reminded of what we can do to help combat COVID-19 as outlined in the email previously sent. We wish for everyone's safety.

Sincerely,

Cherish A. Canda
Administrator
