FAST

EKG TECHNICIAN

(ELECTROCARDIOGRAM)

Job Functions

An electrocardiogram technician performs an EKG by attaching electrodes to a patient to trace electrical impulses transmitted by the heart. A doctor then inspects these readings to analyze the patient's heart condition.

EKG technicians also might perform stress tests. This involves hooking up a patient to an EKG monitor for a baseline reading and then monitoring the patient's heart while he or she exercises on a treadmill.

Job Outlook

Career opportunities for cardiovascular technologists and technicians in general are expected to grow by 29% between 2010 and 2020, according to the U.S. Bureau of Labor Statistics (BLS).

AFFORDABLE

STERILE PROCESSING TECH

Job Functions

A sterile processing technician collects, cleans, decontaminates and sterilizes surgical instruments so they are ready for use in surgery. They play a major role in providing sterile surgical instruments at a timely manner for the success of each procedure. SPD techs are the stewards of the instruments and devices for surgery, ensuring proper disposal, sterile storage and accurate inventory of surgical items. They work closely with surgeons, nurses, and technologists to provide dependable, reliable service to enhance the quality of patient care.

Job Outlook

About 52,500 were employed as medical equipment preparers in 2016. Employment is projected to grow 10.9% from 2016 -2026.

**It has been said that
Sterile Processing is
“The heart of the hospital”**
